

ORIGAMI ROCK TUTORIAL

You will need one 8 1/2 x 11 piece of paper, cardstock or construction paper.

1. Grab a sheet of paper and let's get folding!
2. Start by folding your paper in half, from the top to the bottom, so it's long and skinny.
3. Now, fold your paper in half again, this time from the left to the right, making a square.
4. Repeat this step on both sides, so your paper has four equal squares.
5. It's time to make some diagonal folds! Take the left corner and fold it down diagonally, like you're making a paper airplane. Do the same thing with the right corner.
6. Now, take the bottom left corner and fold it up diagonally along the centerline, just like you did in step 5. Repeat this step with the bottom right corner.
7. Use a pen or butter knife to score all of the diagonal folds, to make sure they're nice and creased.
8. Unfold all of the diagonal folds, so your paper is now folded from side to side, in front of you.
9. Fold your paper in half again, this time from the left to the right.
10. Finally, fold your paper in half lengthwise two times.
11. Open up your paper and voila! You should see a cool template with lots of fold lines.
12. The final step is to crumple the paper up into a ball with both hands.
13. Congratulations!
